ACKNOWLEDEEMENT

It is high privilege for me to express my deep sense of gratitude to those entire faculty Members who helped me in the completion of the **COMMUNITY WORK AND ADULT LITERACY** under supervision of my External Guide Akash Tandon and Internal guide Dr. Neetu Mishra Shukla.

My special thanks to all other faculty members, batchmates & seniors of Amity Institute of Education, Amity University Uttar Pradesh for helping me in the completion of community work and its report submission.

1. ABSTRACT

This report is about my five weeks internship in community work. I am Krishna Mahato, a B.Ed. student of Amity University Uttar Pradesh. I completed the internship at Pehchaan The Street School in Sector 35 Noida near Morna village from 1 June 2026 to 6 July 2026. The internship was part of my B.Ed course Community Work-EDCW100. The work was to contribute to the educational development of underprivileged children and to impart foundational literacy skills to adult learners through the ULLAS programme.

Pehchaan The Street School was started in 2015 by Akash Tandon. It is a volunteer-led organization that provides free education to underprivileged children. My community work consisted of two parts: teaching KG students (4-6 years) with competency based literacy and numeracy instruction for 80 hours and conducting adult literacy sessions for five learners (security guards and cleaners aged 20-45 years) under the ULLAS scheme for 50 hours.

This report highlights the work done by me at the NGO in teaching Nursery, LKG and UKG students and provide them foundation and numeracy skills to the students. The adult literacy programme had 5 adult illiterate persons from my surroundings, which aims to provide them soft skills that are useful in their daily life.

This community work provided me valuable practical experience and essential teaching skills including classroom management, content knowledge, explanation and illustration. This also strengthened my understanding of inclusive education, social responsibility and significance of education in bringing positive changes to individuals and communities.

Overall, the experience contributed significantly in my professional growth as a prospective teacher.

Keywords: Community Work, Adult Literacy, ULLAS Programme, Competency-Based Teaching, Inclusive Education, Pehchaan The Street School

2. INTRODUCTION OF NGO

Pehchaan -The Street School (Trust) is an eight-year-old organization working across various slum areas in Delhi NCR. The organization was founded in 2015 by Akash Tandon.

The organization began with just five children, working on weekends in a small temple space in the slum. The founders knew that short-term social work like food drives and giving out clothes didn't have much impact and they needed to invest in something permanent, something that would provide a lasting change. This led to the creation of Pehchaan The Street School, a sustainable model of community-based education.

Today, the NGO works through over 175 centres across India and with the help of volunteers and has started programmes on school enrolment, academic mentoring, mental health, personality development, online literacy, career awareness, vocational learning, health awareness and community engagement.

Mission:

The mission of Ngo is to provide free education to underprivileged children residing on streets and in slum areas and empower them with the help of quality education. The NGO aims to provide a foundational literacy, numeracy and life skills which can be used by students to build a better future.

- To empower children to break free from the cycle of poverty through quality education.
- To equip children with foundational literacy, numeracy, and life skills needed to build better futures.
- To create a supportive learning environment that fosters confidence, creativity, and holistic development.
- To make education accessible, meaningful, and enjoyable for all learners regardless of their socio-economic background.

Vision:

The vision of Pehchaan The Street School is to create a society where every child, regardless of their background has access to quality education. It aims to build a sustainable model of community-based education that can be replicated across the country. The NGO aims to empower the children with poor backgrounds through education and bridge the gap between privilege and poverty.

3. COMMUNITY PROFILE

The community work was conducted at “Pehchaan The Street School” centre located in a slum area in Noida Sector 35 (Morna Village). The school comprised students of various backgrounds but some of them had never attended school and some were attending government school. These students had very poor educational literacy and numeracy skills. I even found some students who were in class 4 were still not able to properly write sentences. We had to first work on their language skills- alphabets, then words and then simple sentences. This showed us the bad condition of the government schools.

4. NEED AND SIGNIFICANCE OF THE STUDY

Community work is an important part of teacher education as it provides us future teachers with opportunities to apply theoretical knowledge in real-class conditions. Initially, I was hesitant to connect or talk to students but with time I was able to learn how to connect and how to conduct teaching lessons. This helped me polish my existing skills and also learn new skills of teaching like how to break monotony in class-room when students start getting bored. Example- when students in the NGO were getting bored, I did some exercises like hands up and down and some breathing exercises to calm myself as well as the students.

The National Education Policy (NEP) 2020 emphasizes experiential learning and community engagement in preparing teachers sensitive to diverse learner needs. The NEP aims were fulfilled as I was able to experience the learnings of my first year in these classes especially about the various factors of learning- interest, need, motivation and maturation.

- The purpose of documenting my community work was to help me analyze the various things and activities which happened over the whole 5 weeks.
- After analyzing, I was able to identify my weaknesses like before I didn't believe in pre-planning for the class but while doing this I was able to identify its importance and similarly I found my lack of patience, hesitance in interacting which I believe I have reduced over the 5 weeks.
- Similarly, I was able to apply the various teaching skills which I had learned in firsts semester like set induction, explanation, illustration, reinforcement, questioning, etc.
- I was also able to apply the various approaches to teaching like practical, game-based learning, activity based learning to the classroom and see how the pros and cons of each approach like in one class I made the students draw a picture with various shapes and told the students to count the number of different shapes.
- I was also able to understand the importance of differentiated education.

5. DETAILS OF NGO WORK (CHILD EDUCATION)

Overview

The NGO work component of the community work involved teaching KG students (aged 4-6 years) at Pehchaan The Street School. The primary focus was on developing foundational literacy and numeracy skills through competency-based, learner-centred, and activity-based teaching methods. The work was conducted over five weeks, with a total of 80 hours dedicated to classroom instruction and related activities.

Initial Assessment and Grouping

During the first week, I conducted an assessment test to identify the literacy and numeracy levels of the students. The assessment revealed varying levels of learning among the learners. Based on the assessment results, students were grouped according to their learning abilities to enable effective differentiated instruction. Students with weaker foundational skills were provided additional support in alphabet and number recognition, while stronger learners were introduced to more advanced concepts such as number words and shape recognition.

Weekly Activities

Week 1 (1-6 June 2026)

The first week began with an induction ceremony conducted by the founder, Mr. Akash Tandon, where the student-teacher learned about the organization's mission, functioning, and various programmes including adult literacy, education for underprivileged children, and vocational training. Following the induction, on the first day I was assigned to the KG and nursey section comprising children aged 4-6 years.

Initially, I was hesitant as the students were too small and I didn't know how to interact with them. So, I began with my introduction and then I asked their names and classes. Since this was a mixed classroom, we were 5 teachers present there, so we decided to divide the children in groups for effective teaching. This class was fun but at the end we identified that such teaching was not possible and we need to divide the children in groups based on the skill level. So, we together created an assessment sheet to assess their literacy and numeracy skills. Based on the assessment, students were grouped according to their learning levels. Weak students were taught alphabets (A-Z) and numbers (1-100), while stronger students were introduced to number words and shape recognition activities. Each day at the end of the class students were given 15 minutes to make drawings- initially, we made them draw shapes and pictures related to the shapes.

Total NGO Hours: 14

Week 2 (8-14 June 2026)

The second week began with an assessment test as the NGO provided us with guidelines to conduct the test. We conducted the assessment and checked them and found the results as

unsatisfactory, most students were lacking in foundational numeracy and language skills. Some students were not even able to write alphabets.

The second day of the week began with a different approach, among us a teacher- Mehak started the class with all the students learning only alphabets A to Z. She made the students write and recite the alphabets. The other teachers including me guided and we also gave some work to those students who were not even able to write. For such students, we student with tracing exercises like drawing lines, circles and some were give to write alphabets on dotted lines. This was a repetition based work. The whole week we did similar exercises like the alphabets, next day on Wednesday I conducted similar exercise with numbers from 1 to 50. Thursday followed the same method but this time we asked students to come one-by-one to recite alphabets and Saturday was the same for numbers.

Sunday was a whole different thing we conducted a game with the students the students now had to recite the alphabets in an order like one student said A then the student next to him said B this continued till Z and again began; if a student made mistake he was eliminated and continued. We also made some images like helicopter, doll, car. Etc but using shape- circles, rectangle, square, etc and students were asked to draw.

Total NGO Hours: 18

Week 3 (15-21 June 2026)

The third week also followed a similar procedure but we changed few things like first half hour was for alphabets and then we had differentiated teaching for students. As we saw some students who had foundational knowledge we gave them some advanced work.

Foe alphabets, instead of only reciting, we started with alphabets and corresponding words like A for Axe, Apple and similarly we conducted from A to G on first day, H to M on Second day, N to U on third day and V to Z on fourth day. Then we also started with Hindi alphabets similarly for next half hour each day. On 5th and 6th days we again repeated the alphabets similarly but now the students had to take initiative for the alphabets and tell words corresponding to it. Students were asked one by one, this made a fun activity for the students and teachers. While calling out names, there were often mistakes which made it a laughing moment for students.

After the alphabets Hindi and English, we teachers then took our assigned students and based on their levels of knowledge in Maths assigned them different work- some did number exercises while the students I was assigned knew about numbers so I started with simple addition and subtraction.

Total NGO Hours: 18

Week 4 (22-28 June 2026)

The fourth week saw a similar schedule for the classes but now we started with a fun work to make the students remember words with corresponding alphabets, we similar to first week started with English and Hindi words but this time we made the students not only write but

draw the corresponding words like apple was drawn for A and ball was drawn for B and so on. Similarly Hindi alphabets was also taught.

Students not only drew but also recited the alphabet and word. Students were at the end also asked what the word was for the alphabet one by one so the evaluation and reinforcement could be done together, so we can identify if the students had any problems.

Similarly for maths activity, I started with assessing the previous week learning giving them some simple addition and subtraction problems. Then after assessment I found they have learned it but needed practice so on first day I helped them revise and from next day I started with some 2 digit mathematical problems, the students easily grasped simple problems but the problems where carry over was involved students found difficulty. Over the week, I helped them practice numerous problems so they could get familiar with this.

At the end of each day, we conducted some speaking exercises for students so that we could break nervousness of students and make the students more confident in their speaking. Not only that I also conducted some games like matching alphabets and pictures, I had brought some hand-outs for students.

Total NGO Hours: 12

Week 5 (29 June - 6 July 2026)

The fifth week was the final week so we teachers had decided to conduct activities throughout the week not only to assess the learning outcomes but make this internship memorable for us and the students.

Monday began with a Reading Activity where each teacher brought a short story to recite and we recited the story to the students and asked various questions regarding the story. We also asked the students to tell any story if they have, one student recited a story for us about rabbit and tortoise though many have heard of it, it was a good experience listening it from a 4 year old.

Tuesday we conducted a Maths market activity, where we carried out simple maths exercise like we asked students about how many apples there are, what is the price of 3 apples if 1 apple cost Rs. 5. We asked some very simple questions to the students. We had brought hand-outs for the activity.

Wednesday, I brought the same assessment which we had conducted on first week and gave the students. This was to see what was the improvement in the students over the weeks. The test showed there was a significant improvement many students scored over 60% while few students who were very small could only write some alphabets and numbers. Though this showed a significant achievement for us.

Thursday, we conducted a mystery bag activity where I had brought the students the words which we have taught over the week the students either had to make the whole class understand

the word through drawing on board or through acting. Students in this activity thoroughly enjoyed the game especially when some students made funny faces.

Friday and Sunday since these were the last days we just revised and guided the students through words, alphabets, numbers and other things taught throughout the internship. I also provided students with some presents as a farewell gift.

Total NGO Hours: 18

Summary of NGO Work

Table 1 Weekly Summary of NGO Work

Week	Dates	Key Activities	Hours
Week 1	1-6 June 2026	Induction, assessment, alphabet and number recognition, shape identification, drawing activities	14
Week 2	8-14 June 2026	NGO worksheet assessment, alphabet and number writing, vocabulary, addition-subtraction, robotics workshop observation, creative drawing	18
Week 3	15-21 June 2026	Revision, word formation, picture-word association, addition-subtraction games, table practice, reading practice, integrated activities	18
Week 4	22-28 June 2026	Sentence formation, reading comprehension, numeracy activities, educational games, assessment	12
Week 5	29 June - 6 July 2026	Reading Circle, Maths Market, Mystery Bag, final assessment	18
Total			80

6. DETAILS OF ULLAS ADULT LITERACY WORK

Overview

The adult literacy component of the community work was conducted under the ULLAS (Understanding Lifelong Learning for All in Society) programme, also known as the New India Literacy Programme (NILP). The ULLAS programme is a centrally sponsored scheme of the Government of India implemented in alignment with the National Education Policy (NEP) 2020. The scheme targets all non-literates of age 15 years and above and comprises five components: Foundational Literacy and Numeracy, Critical Life Skills, Basic Education, Vocational Skills, and Continuing Education.

The adult literacy sessions focused primarily on the foundational literacy and numeracy component, along with critical life skills including financial literacy and communication skills. The sessions were conducted over five weeks, with a total of 50 hours dedicated to adult literacy instruction.

9.2 Profile of Adult Learners

The adult literacy programme involved five adult learners from the community. Table 3 provides details of the adult learners.

Table 2 Table 2: Details of Adult Learners

S. No.	Name/Initials	Age	Occupation
1	Anshul	30	Security Guard
2	Ram Lakhan	20	Security Guard
3	Gyashi Lal	45	Cleaner
4	Teeja	40	Cleaner
5	Jyothi	28	Cleaner

All five adult learners were non-literate or had very limited literacy skills at the beginning of the programme. Their occupations—security guards and cleaners—required minimal literacy, which had contributed to their lack of formal education. However, all learners expressed a strong desire to acquire literacy and numeracy skills to improve their daily lives and access better opportunities.

Weekly Adult Literacy Activities

Week 1 (1-6 June 2026)

First week I started with learning about them, their work and if they had any formal education. I was able to identify Jyothi, Anshul and Ram Lakhan, they had completely till class 8th but

Teeja and Gyashi Lal had never gone to school. So, I had to teach them differently for those who had gone to school till class 8, I started with communication and speaking skills. I helped them speak a little in English. While for the other group, I started with writing exercises, they could read alphabets and numbers but were not proficient in writing skills. So, I helped them in writing exercises. I also provided them with some reading exercises with a simple book in hind.

Total Adult Literacy Hours: 10

Week 2 (8-14 June 2026)

During the second week, adult literacy sessions were conducted regularly in group format. I continues with the same topics as the first week- one group continued the speaking and reading exercises while the other group did repetition exercises and reading as well. First 3 days, I continued with the same schedule and then I started with some more exercises like how to fill forms and how to make signatures. I also taught them some simple math exercises which I found they were proficient in and so I did some advanced exercises.

I also asked them about their situations and consulted Anshul and Ram Lakhan to complete their school level at least as this will help them in their future.

Total Adult Literacy Hours: 10

Week 3 (15-21 June 2026)

The 3rd week focused on mainly reading exercises. I brought them Bhagwad Geeta and a novel in English- The Alchemist. The whole week involved the reading skills and told them the importance of reading – broadens our mind, helps us to view things differently and helps us to see situation in many ways. The whole week developed reading and literacy skills.

Total Adult Literacy Hours: 10

Week 4 (22-28 June 2026)

Fourth week involved some functional skills like how to use electronics like mobile and computer, how to read bills, notices and forms. I also taught them about some government initiatives on different businesses; and about financial budget and its importance for public use.

Sessions during the week included:

- Reading short sentences and signboards
- Writing names, addresses, and simple applications
- Financial literacy: money counting, budgeting, and expenditure recording
- Reading bills, notices, and forms

- Communication practice, discussion, and revision

Total Adult Literacy Hours: 10

Week 5 (29 June - 6 July 2026)

This was the final week and it was more about assessing what they have learnt over the whole week. It involved communication, speaking and listening skills. I recited some sentences to them and asked them to explain the meaning of them. On Wednesday, I asked them to say some lines in English to see their proficiency. Similarly in hindi to improve confidence in their speaking skills and on last day Saturday I checked the mathematical proficiency with a simple assessment work.

Sessions during the week included:

- Revision of alphabets, numbers, and basic reading skills
- Writing names, addresses, and simple sentences
- Reading short passages and comprehension activities
- Practical numeracy and money calculation exercises
- Communication practice, revision, and final assessment

Total Adult Literacy Hours: 10

Figure 2 ULLAS Adult Literacy

Summary of Adult Literacy Work

Table 3 Summary of Adult Literacy Work

Week	Focus Areas	Hours
Week 1	Introduction to alphabets and numbers, signature writing practice	10
Week 2	Alphabet recognition, number writing, counting, addition, subtraction, oral repetition	10
Week 3	Reading common words, writing names and addresses, basic calculations, reading notices	10
Week 4	Reading short sentences, writing applications, financial literacy, reading bills and forms	10
Week 5	Revision, reading passages, writing practice, numeracy, communication, final assessment	10
Total		50

TEACHING METHODS USED

The teaching methodology adopted for both the child education and adult literacy components was predominantly learner-centred and activity-based. Table 4 provides an overview of the teaching methods used.

Table 4: Teaching Methods Used

Table 4 Teaching Methods Used

Teaching Method	Description	Application
Competency-Based Teaching	Instruction tailored to individual learning levels	Grouping students according to abilities; focusing on specific competencies
Activity-Based Learning	Learning through engaging activities and games	Vocabulary Treasure Hunt, Sentence Builder Race, Maths Market, Mystery Bag
Repetition and Revision	Regular reinforcement of previously taught concepts	Daily revision exercises; oral quizzes; educational games

Differentiated Instruction	Adapting methods and materials for different abilities	Separate activities for weak and strong learners; individualized support
Collaborative Learning	Peer-supported learning in groups	Group activities; peer tutoring; collaborative problem-solving
Practical Application	Connecting learning to real-life situations	Money counting; reading notices; household calculations
Positive Reinforcement	Encouragement and appreciation	Verbal praise; appreciation activities; celebrating achievements
Oral Interaction	Verbal engagement and questioning	Oral repetition; questioning; discussions; reading aloud
Creative Activities	Artistic and imaginative expression	Drawing; storytelling; creative writing
Experiential Learning	Learning through direct experience	Robotics workshop observation; hands-on activities

8. MATERIALS AND RESOURCES USED

Teaching and Learning Materials

The following materials and resources were used during the community work:

1. **Blackboard and Chalk:** Used for demonstration, explanation, and guided practice.
2. **Notebooks and Writing Materials:** Used for writing practice, exercises, and creative activities.
3. **Picture Cards:** Used for vocabulary development, word-picture association, and sentence formation activities.
4. **Worksheets:** Used for numeracy practice, reading comprehension, and assessment activities.
5. **Story Books:** Used for reading comprehension activities.
6. **Educational Games:** Used for revision and reinforcement activities.
7. **Drawing Materials:** Used for creative activities and self-expression.
8. **Real-life Materials:** Used for practical numeracy and financial literacy activities (e.g., money, bills, forms).

9.OBSERVATIONS AND ANALYSIS

Over this month long internship, this has helped me to grow as a prospective teacher. This has helped me to apply the theoretical teachings I have learned in my course in real-class scenarios. Over the month, I learned:

1. Importance of how important it is to prepare beforehand for the class, initially when going to class didn't prepare early and thought it would be easy but those classes taught me that without a plan in mind, class becomes chaotic.
2. It helped me refine my class management skills.
3. It helped me to show my explanation and illustration skills and polish them over time as I taught the students in the class.
4. The internship helped me identify what were my gaps in skills and what I should do to improve them.
5. Importance of varied teaching methods – class can not be conducted with only one method, there should be amalgamation of various teaching methods.

Over the five-week period, children demonstrated gradual but consistent improvement in literacy and numeracy skills. At the beginning of the programme, many children struggled with alphabet and number recognition. By the end of the programme, most children were able to recognize alphabets, form simple words, read short sentences, and perform basic arithmetic operations.

Both children and adults throughout the month showed consistent improvement through regular practice. Activity-based methods proved more effective than traditional instruction. Learning connected to real-life situations was more meaningful. Positive reinforcement improved confidence and participation. Regular assessment helped track progress and identify areas requiring reinforcement.

10.CHALLENGES AND SOLUTIONS

Table 5 Challenges and Solutions Adopted

Challenge	Solution Adopted
Different learning levels	Ability-based grouping; differentiated instruction
Limited attention span	Activity-based learning; educational games
Need for continuous reinforcement	Regular revision; repetition; oral quizzes
Learner hesitation	Positive reinforcement; collaborative learning
Irregular attendance	Flexible scheduling; additional support
Limited resources	Creative adaptation; use of locally available materials

Language barriers	Visual aids; simplified language
Classroom management	Clear routines; engaging activities

11. LEARNING OUTCOMES

Course Learning Outcomes (CLOs) Achieved

The community work successfully addressed all six Course Learning Outcomes (CLOs) prescribed in the B.Ed. curriculum:

1. **CLO1 (Remember):** I learned about the ethical standards for doing community work and the key principles of organizing community work like there should be no tardiness by volunteers or we as B.Ed students should especially think it as a real classroom and the students as a benchmark for assessing our teaching skills at the induction ceremony and ongoing engagement with the NGO.
2. **CLO2 (Understand):** I gained understanding of the importance of community needs through interacting with learners especially those with poor backgrounds. I was able to understand how important education can be in their life upliftment.
3. **CLO3 (Apply):** I applied the various teaching strategies and approaches which I had learned throughout my course. Teaching the kids of Nursery classes also taught me conflict resolution strategies as the students were always fighting among themselves.
4. **CLO4 (Analyze):** I was able to analyze my own teaching skills and the weaknesses present in me. I especially used this month to identify these and prepare strategies to overcome them like my lack of content knowledge and vocabulary. I started brushing up my content and read some books to improve.
5. **CLO5 (Evaluate):** I evaluated myself as a future teacher and found myself lacking in various places like my teaching skills, communication skills and other soft skills. I have prepared strategies to improve and also apply them during my internship teaching.
6. **CLO6 (Create):** With the help of this community work, I learned to prepare assessment tests, how to check them and what type of feedback should be given to students. Not only that I was able to prepare diagnostic tests and remedial teaching these are the skills I learned during my semester 2 and applied here.

12. SKILLS DEVELOPED

Table 6 Skills Developed During Community Work

Category	Skills Developed
Teaching Skills	Competency-based teaching, activity-based teaching, differentiated instruction, classroom management, assessment, lesson planning

Communication Skills	Verbal communication, non-verbal communication, active listening, questioning, feedback
Interpersonal Skills	Empathy, patience, adaptability, collaboration, leadership
Reflective Skills	Self-reflection, critical thinking, problem-solving, documentation
Community Engagement Skills	Community outreach, social responsibility, cultural sensitivity, advocacy

13. IMPACT ON LEARNERS

Table 7 Summary Table: Impact on Learners

Area of Impact	Children	Adult Learners
Academic	Improved alphabet recognition, word formation, reading comprehension, and basic arithmetic	Developed foundational literacy and numeracy, functional literacy, and financial literacy
Social/Emotional	Increased confidence, improved communication, enhanced creativity, positive attitude towards learning	Increased confidence, reduced hesitation, improved communication, sense of achievement
Practical/Long-Term	Tried to instill habit of self-learning, reading books and also helped them to view learning as a fun activity instead of burden	Improved daily functioning, better employment opportunities, empowerment, role modeling for families

14. REFLECTION AND SELF-EVALUATION

Over the whole month of internship, there was significant improvement in my whole personality. This not only impacted my teaching ability but also how I presented myself, how I spoke and how I taught.

In my personality, I was able to find methods to remain calm and talk to those students unwilling to learn and motivate them. This also taught me how I should present myself to others while teaching as well as other time. I also learned that while teaching there are times when you need to be serious and when you can have fun with students.

I also learned and polished my teaching skills- introducing topics, explanation, illustration and especially classroom management. The classes I was assigned- Nursery, LKG and UKG these

classes were chaotic as the students were small and I had to manage them not only to keep quiet but also learn.

This helped in improving my communication skills as I communicated with the children, adult learners, the NGO volunteers and the parents of the children.

Key Takeaways

Table 8 Key Takeways

S. No.	Key Takeaway
1	Education is transformative— it can help uplift the learners.
2	Learner-centred approaches are more effective than traditional methods but both methods are necessary while teaching.
3	Patience and empathy are essential qualities for effective teaching
4	Community engagement is vital component of teacher education
5	Reflective practice leads to continuous improvement and professional growth
6	Every learner deserves quality education and opportunity to reach full potential

15. CONCLUSION

The 5-week community work and adult literacy work from 1 June to 6 July brought a significant transformation in me. I was able to improve significantly my teaching skills and learn how important education is to bring a overall transformation in society. This whole month has been a memorable experience for me applying the various theoretical knowledge I had gained in the 1 year of my course. Using that I was able to significantly improve and learn how these can be applied in a class room scenarios. This internship was one of the most meaningful experiences of my B.Ed. programme. It helped me understand how to teach outside a regular school environment. Working with children and adult learners improved my confidence and strengthened my interest in becoming a teacher.
